LUKOIL TO PROVIDE FIRST ENGINE OIL FILLING FOR CARS MANUFACTURED IN KALININGRAD

LLK-International (a wholly-owned LUKOIL subsidiary) signed an agreement with the Kaliningrad manufacturer Avtotor on the first filling of the engines of GM, GM Dat and Opel cars with its GENESIS FE 5W-30 oil.

LUKOIL won the right to sign the contract as the successful bidder in a tender involving five companies.

GENESIS FE 5W-30 is a new generation of all-season engine oil compliant with the modern requirements by car manufacturers for energy saving. The oil is certified for compliance with the dexos1 standard, which is confirmed by the certificate issued by the General Motors Corporation on February 28, 2012.

LUKOIL is the only Russian oil company whose products have been certified for compliance with this standard.

As previously reported, last April, LLK-International signed an agreement with General Motors Powertrain Uzbekistan on the first filling of cars manufactured by General Motors in Tashkent with LUKOIL GENESIS oils.
