LUKOIL UPDATES MOBILE APPLICATION TO BRING MORE CONVENIENCE TO ITS GAS FILLING STATIONS

To improve the quality of service at its gas filling stations and let customers pay for fuel even more easily, LUKOIL has presented new functions of its mobile application, *LUKOIL GAS STATIONS*.

The fundamental novelty is that one can fill up and pay at the gas station directly from the mobile application with the help of a banker's loyalty card. To use the application, a customer should insert a fuel nozzle in the tank and follow intuitive coach marks on the screen.

A plastic loyalty card is no longer needed to accumulate bonus points or dispose of them, as the application features the card's virtual copy.

The updated version of the application also advises on promotional offers and contests, the company's product range and bonus-point statistics. There is a *contact us* button.

The application is available for download through App Store and Google Play.
