LUKOIL RECEIVES WINTER PREPAREDNESS CERTIFICATES

All LUKOIL Group's facilities received winter preparedness certificates for 2019 – 2020.

With action plans to get prepared for operation in autumn and winter of 2019 already developed, LUKOIL's power generation facilities have started weekly monitoring to ensure compliance with the schedule. Almost fifteen hundred winterization measures, taken across LUKOIL's power generation assets, included major overhauls and maintenance of main process and auxiliary equipment, integrity tests of main heating systems, training and qualification of personnel.

Certification of a facility guarantees compliance of power generation equipment with technical standards and its preparedness for continuous supplies of electricity and heat to end consumers in winter months.
