LUKOIL PRODUCES ITS 2 BILLIONTH TONNE OF REFERENCE FUEL IN RUSSIA

On 16 August 2015, PJSC LUKOIL produced its 2 billionth tonne of reference fuel in Russia since the company's foundation in November 1991.

The company mostly operates in four federal districts of the Russian Federation – North-Western, Volga, Ural and Southern districts. Almost half of the company's oil and gas is produced in Western Siberia.

"It is symbolic that LUKOIL has produced its 2 billionth tonne of reference fuel in Russia not only on the verge of the Petroleum Industry Workers professional holiday, but also on the eve of the anniversaries of the three cities considered to be the historical cradle land of the company. In September we will be marking the 30th anniversary of Langepas and Kogalym and the 50th anniversary of Urai," said Ravil Maganov, First Executive Vice President of PJSC LUKOIL.
